## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-55 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Larnard et al '772.

Larnard et al discloses a processor 19 having a first state for benign heart rhythm comprising a normal sinus rhythm and a second state responsive to a non-benign heart rhythm comprising classifying cardiac events as bradycardia or tachycardia.

Regarding claims 5, 7, 13, 17, 20, 26, 45 and 52, the evidence of atrial flutter is provided by the detection circuitry of the atrial data path 170 of the algorithm which performs an event and peak detection determination at 171 and then loads the time of the atrial P-wave peak into an atrial buffer at 172.

Regarding claims 37-41 sensing electrodes 11 provides first and second sensors. Pacing therapy is delivered from the action module 20 to the atrial and ventricular sensing and pacing leads 11 and 12 by means of a bus 21.

Regarding applicants remarks filed 6/18/04, Larnard et al clearly shows multiple computational states in that a microprocessor inherently performs computations. Further, claim 1 does not appear to require the device to change operational states.

The processor 19 performs executing discriminatory arrhythmia classification algorithms. See Fig. 2, elements 105 and 106.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
